

GOOD ROADS MACHINERY

the good roads movement in Spartanburg County with all the speed the funds at his command will allow. He believes in getting proper machinery for doing the work well and then make every job a lasting one.

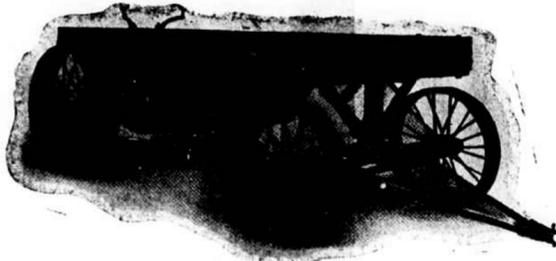

THE ROAD MACHINERY.

The various road machines illustrated in this edition and owned by the county and city were bought from manufacturers represented by Col. W. A. Neal, who is the state agent for the sale of these machines for this state, Georgia and Florida. Col. Neal has made a careful study of the requirements for roadbuilding in this section and has also devoted much study on the various machines that economize time and labor. In fact, he is one of the best experts on road-making in the country and is doing great work in interesting committees and municipalities in getting proper machines to do the work in the most thorough and economical manner possible. It may be said truthfully that he is largely responsible for the great impetus given roadmaking in recent years, by property. His charges are moderate visiting the various communities and but the best service possible is guaranteed just what can be done anteed. His office is in the Heneman Building.

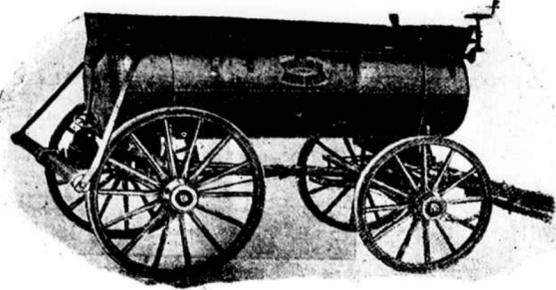

HUGH R. CANNON.

Mr. Cannon is the youngest business man in Spartanburg doing business for himself. He is engaged in renting property, looking after the owner's interest, and collecting rent. He has been successful in a marked degree and by his fidelity to his clients has become of valuable assistance to non-resident owners and many residents who are so closely occupied as not to be able to give proper care to the renting of their roadmaking in recent years, by property. His charges are moderate visiting the various communities and but the best service possible is guaranteed just what can be done anteed. His office is in the Heneman Building.
